HAMs in Portugal and Slovenia get more space for amateur radio on the 6m band. Starting from Apr 4, 2012, amateur radio operation on 6m is allowed on 50-52 MHz in Portugal (at the moment on 50,0-50,5 MHz). The Portuguese PTT explains that with the shutdown of analog television. Slovenian HAMs can work on 5260 kHz with 100 watts - for one year. [Southgate ARC]

VP8DMH rides again...

After thinking that my time down South was done, it seems I'm going back.

The British Antarctic Survey have offered me a summer post for the coming season. This time I'll be going to Halley, between the end of December and the beginning of March.

Halley is the second-largest station, after Rothera where I was stationed last time. There has not been much recent amateur activity from the station to my knowledge, which I hope to rectify! As well as the opportunity to activate

Halley 5 (the current base), this year sees the commissioning of the new base at Halley 6.

The short summer season will obviously be very busy, especially with the commissioning of the new station, but my intention is to put both the old and new base on the air as time permits.

Off to Cambridge tomorrow to consign my trusty K3 for shipping...

WP4FE receives 9N1FE callsign -
My name is Fernando Cardona from Puerto Rico, USA (WP4FE), I got my Nepal license (9N1FE) last week and will be active occasionally, only in 20M, when I have some free time since I am working here in a mission Hospital (Scheer Memorial Hospital of the Seven day Adventist Church in Banepa, Nepal, that is located 30 kilometers East of Kathmandu). I am using a old Kendwood TS-120S with a comet H422 antenna in V, 25 to 30 meters high in top of a water tank.
Thank you 73, Fernando 9N1FE
